

FOR IMMEDIATE RELEASE

Trevi Therapeutics to Present at UBS Global Healthcare Conference

New Haven, CT, May 17, 2018 - [Trevi Therapeutics, Inc.](#) (“Trevi”), a late-stage biopharmaceutical company focused on developing [Nalbuphine[®] ER](#) for chronic pruritic conditions, today announced that Jennifer Good, President and Chief Executive Officer, will present at the UBS Global Healthcare Conference. The presentation will take place at the Grand Hyatt in New York City on Monday, May 21 at 3:00 pm ET.

About Trevi Therapeutics, Inc.

Trevi Therapeutics, Inc. is a late-stage biopharmaceutical company focused on developing Nalbuphine ER for chronic pruritic conditions. Pruritus develops in various dermatologic, metabolic, hematologic and neuropathic conditions. The Company is pursuing several pruritic conditions for clinical development, including its lead indication of prurigo nodularis. Prurigo nodularis is a chronic pruritic dermatologic condition characterized by the presence of pruriginous lesions (excoriative/ulcerative papules and nodules) on the skin. There are no approved therapies in the US or EU for this condition.

Nalbuphine[®] ER is an oral extended release synthetic opioid with a dual mechanism of action, mu receptor antagonist and kappa receptor agonist, both of which have been shown in research to be effective in abolishing itch. Because of Nalbuphine ER’s unique dual mechanism of action, which has shown efficacy in addressing pruritus in human clinical trials, the Company believes Nalbuphine ER can have broad utility in treating chronic pruritus.

Founded in 2011, Trevi is headquartered in New Haven, CT. For additional information, visit www.trevitherapeutics.com.
